Have your say on electric car charging points in Bexley

If you live or run a business in Bexley we would like your views on the introduction of electric vehicle (EV) charging points in the borough.

Your views will help shape the Council's plans for creating a network of publicly accessible charging points across Bexley.

The survey is available online and takes only a few minutes to complete.

Electric cars are not only kinder to the environment but can also save you money on fuel costs. There are other benefits too, including government grants for new plug-in vehicles, 100% discount on the congestion charge, no vehicle tax (VED), or a reduced rate depending on their CO2 emissions.

The Council wants to help people with electric vehicles that don't have access to their own off-street parking and is looking at installing electric vehicle charging points in residential streets.

Your feedback will help us find out which areas would benefit the most.

If you'd like to see charging points on your road, please let us know your views and register your details.

The survey can be completed online at www.surveymonkey.co.uk/r/chargingupbexley
